

Moving Forward, Making a difference: Your Virtual Toolkit for Invasive Species in Vermont

The work we do controlling non-native invasive species makes a difference in our forests, parks and natural lands. It makes a difference in our Vermont economy, it makes a difference to our fish and wildlife, and it makes a difference in our ability to enjoy the outdoors of Vermont.

There are many great resources available to help you to continue this important work on lands under your control and management – your homes, town forests, businesses, and more.

This is your virtual toolkit for where to learn more; simply follow the website links provided.

Learning more about the problem of invasive species:

<http://invasive.org/101/index.cfm>
