

Emerald Ash Borer (EAB) Infested Area in Vermont: May 7, 2018

This map depicts the EAB Infested Area in Vermont to which the Slow the Spread Recommendations refer. This should not be confused with the federal quarantine.

Confirmed Infested Areas are within 5 miles of a known infestation. While symptoms may not be obvious, it is likely that EAB is present in much of this area.

High Risk Areas extend 5 miles from the outer edge of a Confirmed Infested Area. EAB is likely expanding into, and present in some of this area.

All ash in Vermont is within the federal EAB quarantine boundary. It is your responsibility to know where the current boundaries of the federal EAB quarantine are located. Moving material outside of the federal EAB quarantine without a compliance agreement can result in penalties. For more information on moving wood outside of the federal quarantine contact Tony Slowik - Plant Health Safeguarding Specialist USDA APHIS 802-224-1405

Legend

- EAB Infested Area
- Confirmed Infested Area
